**Did You Know?**

All our plants are grown in localized regions of Nebraska, Iowa & Northern Missouri. We contract with small businesses/greenhouses to grow our materials. In this way, we support small businesses that provide local jobs and have a positive effect on all our communities.

Many small greenhouse ranges are disappearing due to the crushing competition from big chain stores. This affects the consumer because smaller ranges that used to grow a large variety of plants are being eliminated. This also limits your choices as a consumer. This fundraiser supports your local organization as well as those businesses committed to growing a quality product while still providing customized plant options for you the consumer.

From all of us at Janet’s Jungle,  
**Thank you.**
